LC Learn about Monet's style of painting.

When Monet was an adult he loved painting the countryside. He would paint the same scene at different times of the year, to show the different seasons.

Monet often worked outside. He used oil paints and applied thick layers of paint. He used short brush strokes and he liked to use bright colours.

Can you practise using short strokes, and bright colours, to create a picture? Try using crayons or pencil crayons if you haven't got any paints.
