LC: Can I explain how bronze was made?

Fill in the flow chart to show how bronze was made through the smelting process.

Stick the parts of the sequence in the correct order.

**How bronze was made**

Make a really hot fire and heat the rocks.

Extract the pure metals from the heated rocks.

Find rocks containing tin and copper. These are called ores.

Pour the liquid bronze into a shaped mould to set.

Mix together the copper and tin to make liquid bronze.
